

PRISM ERI Release Notes

PRISM ERI v1.0.2

September 4, 2026

Overview

Version 1.0.2 - Added converter tools and defaulted One-to-One mode to automatically Rebuild index.

What's New:

- Added a Tools menu to PRISM ERI.
- Added a built-in PDF Converter for converting PDF documents into structured Excel files for use as PRISM inputs.
- Added support for installable custom converter packages (.prismconverter).
- Added Manage Converters and Installed Converters interfaces for installing, launching, and removing custom converters.
- Workflow Improvements: In One-to-One mode, Rebuild Index is now enabled automatically to ensure the selected reference file is indexed for the current comparison and to avoid confusion about whether a manual rebuild is required.

No Functional Changes

This release does not change:

- Assessment results
- Matching accuracy
- Matching algorithms
- Output format
- Licensing

Existing licenses remain compatible with Version 1.0.2.

Installation

1. Install PRISM ERI using the installer for your operating system.
2. Launch PRISM ERI.
3. Select **Help** → **License Status**.
4. Click **Send Machine ID** (recommended) or manually email your Machine ID to keith_carley@att.net.
5. Include your full name and company name.
6. A license file will normally be returned within **24–48 hours** (requests received late Thursday or Friday are typically fulfilled the following Monday).
7. Save the license file.
8. Select **Help** → **Import License** and choose the saved license.
